General Comments

Except for minor punchlist items, FWS fieldwork is complete. No inspection because I was on vacation. The automatic drains on the end of the Skayway compressed air piping at the transition between the steel OBG and the concrete section, east of hinge AW/AE outside the IB barriers need to be replaced. ABF was sent an email request asking if they would be interested in replacing these under the 04-0120F4 contract. In an email today, ABF declined to perform this work.
